PUBLICATIONS

Books

2012 *Libertarianism: What Everyone Needs to Know* (Oxford: Oxford University Press), under contract.

2011 *The Ethics of Voting* (Princeton: Princeton University Press)

From the jacket:

Nothing is more integral to democracy than voting. Most people believe that every citizen has the civic duty or moral obligation to vote, that any sincere vote is morally

acceptable, and that buying, selling, or trading votes is inherently wrong. In this provocative book, Jason Brennan challenges our fundamental assumptions about voting, revealing why it is not a duty for most citizens—in fact, he argues, many people owe it to the rest of us *not* to vote. Bad choices at the polls can result in unjust laws, needless wars, and calamitous economic policies. Brennan shows why voters have duties to make informed decisions in the voting booth, to base their decisions on sound evidence for what will create the best possible policies, and to promote the common good rather than their own self-interest. They must vote well—or not vote at all. Brennan explains why voting is not necessarily the best way for citizens to exercise their civic duty, and why some citizens need to stay away from the polls to protect the democratic process from their uninformed, irrational, or immoral votes. In a democracy, every citizen has the right to vote. This book reveals why sometimes it’s best if they don’t.

2012: Expanded paperback edition of *The Ethics of Voting*, with new afterward “How to Vote Well”.

2010 *A Brief History of Liberty* (Oxford: Wiley-Blackwell), with David Schmidtz.

From the jacket:

Through a fusion of philosophical, social scientific, and historical methods, *A Brief History of Liberty* provides a comprehensive, philosophically-informed portrait of the elusive nature of one of our most cherished ideals.

- Offers a succinct yet thorough survey of personal freedom
- Explores the true meaning of liberty, drawing philosophical lessons about liberty from history
- Considers the writings of key historical figures from Socrates and Erasmus to Hobbes, Locke, Marx, and Adam Smith
- Combines philosophical rigor with social scientific analysis
- Argues that liberty refers to a range of related but specific ideas rather than limiting the concept to one definition

2013: Translated into Italian and reprinted, Torino: IBL Libri.

CURRENT RESEARCH

Having finished *The Ethics of Voting*, I am now working on *The Politics of Voting*. I argue that the political liberties are typically not of much value to the people that hold them. Both epistocracy and democracy can be *just*, if not *ideal*, in principle, but neither is likely to be just in practice. I argue that citizens have a right to competent political administration, and that for a democratic can be legitimate only insofar as it ensures competence. I argue that an epistocracy can be compatible with public reason liberalism and is thus in principle just. However, I describe a hybrid of democracy and epistocracy—democracy with epistocratic veto—that should be less subject to abuse than epistocracy but at the same time alleviate epistocrats’ concerns about democratic incompetence. Contrary to the status quo in democratic theory, I argue that epistocracy is compatible with the liberal principle of legitimacy. I challenge arguments claiming that the political liberties must be distributed equally as a matter of basic justice. Finally, I argue that mandatory voting laws are unjust, unnecessary, and potentially harmful.
